Children's Behavioral Health System

VISION

All Iowa children will live safe, healthy, successful lives with their families and friends, and in their schools and communities and have access to an array of behavioral health core services and supports that they need.

MISSION

The Children's Behavioral Health System will improve Iowa's well-being as a whole; build healthy, resilient children and families; and provide educational growth through an array of behavioral health services and supports across systems in Iowa.

Iowa will create and sustain a high quality Children's Behavioral Health System driven by defined outcomes that provides comprehensive education and screening, effective services and supports, coordinated governance, and robust funding.

REASON TO ACT

The health, safety, and welfare of Iowa's children are of utmost importance. Access to an array of services and supports is essential. The current children's behavioral health system is inadequate to address our children's behavioral health needs. Iowa has the opportunity to become a leader in children's behavioral health services and as a result attract and retain residents and businesses.
